Responsibility statement

Reference is made to the Statement of the Board of Management on page 25 of the Annual Report.

Deviations from the Corporate Governance Code

The practices where the Company deviates from the Code are the following:

1. Options for the Management Board (section 3.1.2 under vii of the Code)

With respect to section 3.1.2 under vii of the Code, the Company believes that its future success will depend in large part on the continued services of its members of the Board of Management and key employees. The Company believes it is essential that it can offer internationally competitive remuneration packages to qualified members of the Board of Management. In line with the recommendations of the Remuneration Committee and in line with industry practice, the options granted to members of the Board of Management to acquire shares in the capital of the Company will be a conditional remuneration component which becomes unconditional when a member of the Board of Management is still in the service of the Company at the start of the following year. These options may be exercised within the first five years of granting, provided that these options have vested in line with conditions set by the Board of Supervisory Directors and approved by the shareholders. The Board of Supervisory Directors considers the total compensation for the members of the Board of Management to be in line with international industry practice and significantly driven by long-term incentives, the potential values of which are fully dependent on value creation for all shareholders.

2. Regulations governing ownership of and transactions in securities, other than issued by the Company, by the Management Board or the Board of Supervisory Directors Members (section 2.7.2 of the Code)

The Company believes that the members of the Board of Management and Board of Supervisory Directors should not be further limited by regulations in addition to commitments which are already applicable pursuant to Dutch law and regulations.

3. Shares for the Supervisory Board of Directors (section 3.3.2 of the Code)

To continue to be able to attract and retain top talent in a competitive and global environment and to focus the Supervisory Board of Directors on creation of sustainable added value, the Company believes it is in line with international standards to have its Board of Supervisory Directors participate in the Company's Long Term Incentive Plan ("LTIP"). The LTIP is further described in the Annual Report 2017.

4. Follow in real time all the meetings (section 4.2.3 of the Code)

Considering the Company's size, it would create an excessive burden to provide facilities that enable shareholders to follow in real time all the meetings with analysts, presentations to analysts, presentations to investors referred to in the best practice provision. However, the Company ensures that presentations are posted on the website immediately after the meetings in question and is exploring ways to make some meetings (such as the Annual General Meeting) accessible in real time at least in Audio format. Meetings discussing financial results and other significant news will be announced and conducted in accordance with this provision.

5. Independent third party to hold proxies (section 4.3.2 of the Code)

Given its size, the Company does not believe it is appropriate at this time to appoint an independent third party to hold proxies. The Company does make provision for shareholders to appoint their own independent third party proxies.

6. Outline policy on bilateral contacts with the shareholders (section 4.2.2 of the Code)

The Company values interactions with its shareholders and is prudent in maintaining bilateral contacts.

7. Internal Auditor (sections 1.3 - 1.7 of the Code)

Due to the size of the Company, Pharming has not created a specific position for an internal auditor but it has provided for the assessment and testing of the risk management and control systems to be supported by the Finance Manager. As a result of the Company operating in the highly regulated field of development and world- wide commercialisation of Human Medicines, the Company has a fully staffed Quality Assurance department which is responsible for, inter alia, keeping up an extensive system of Standard Operating Procedures throughout the Company and for the execution of Audits on all (major) suppliers, subcontractors, licensees and internal departments of the Company including the Finance department, although this is not the same as an internal auditor. The audit committee has reviewed the need for an internal auditor on March 28, 2018. Based on this review, the Supervisory Board has recommended to the Management Board that due to the size of the company no internal auditor is needed at this point in time. The audit committee reconsiders this position annually. The growth of the Company at present may cause a different determination at some point in the foreseeable future. This recommendation is included in the report of the Supervisory Board in the Annual Report.
