

Introduction:

Pharming Group N.V. develops innovative protein therapeutics for the treatment of genetic disorders. The company is poised for further scientific, technological and new product development and additional commercial roll-outs. The company is small (approx. 200 employees, based internationally) and growing quickly. As a result of this growth, we are looking for a:

Research Associate Process Development

Overall purpose of the job:

Within the R&D department, as part of the process development group, you will be working on the development of state-of-the-art downstream purification processes for protein therapeutics.

Main duties and responsibilities:

- Responsible for the planning, execution and documentation of lab-scale chromatography and filtration experiments
- Technology transfer and support of purification processes already transferred and scaled-up at contract manufacturing organizations

Qualifications:

- Bachelor in biochemistry, biotechnology, process engineering or equivalent
- At least 5 years of experience in process development with various protein purification techniques (*e.g.*, chromatography, filtration)
- Experience in conducting analytical methods (*e.g.*, ELISA, HPLC, SDS-PAGE)
- Experience in writing development plans and reports
- Experience in the biopharmaceutical industry is preferred

Skills:

- Good knowledge of English, both in word and writing
- Accurate and flexible
